

Health, Safety, and Environment Strategy

Lundbeck has a Health, Safety and Environment (HSE) strategy to ensure a prioritized, coordinated and long-term HSE effort.

Our HSE strategy ensures that Lundbeck is acting responsible and ambitious in relation to HSE and is an integral part of our Code of Conduct and broader sustainability framework. The HSE strategy is transformed into action through our ISO 14001 and ISO 45001 certified HSE management system which enables our manager and employees to think and act 'green and safe'.

HSE Strategy Focus Areas

Our Corporate HSE Targets 2022

63%

Recycling of organic compounds used in chemical production

70%

Recycling of general waste

0

CO₂ emissions in 2050 at the latest

≤4

High-consequence work-related accidents with absence

≤5

Losttime accident frequency
